# **PRODUCTION AREA**

#### SOILS

Volcanic origin, mainly clayey-limestone, rich in minerals and micro-elements, which promote the production of grapes really suitable for the sparkling and semi-sparkling wine.

# HARVEST

Depending on the vintage harvest takes place between the end of August and beginning of September in order to ensure the right grape maturity and a good acid content

#### VINIFICATION

Soft pressing of the grapes and fermentation in stainless steel tanks at controlled temperature in order to maintain the natural aromas of the grapes and obtain a basic wine rich in acids and perfumes.

The secondary fermentation (foam fermentation) takes place with the inoculation of selected yeasts in stainless steel tanks at controlled pressure and temperature (pressure-tank) following the Charmant method, for a period of not less than a month.

# COLOUR

Straw yellow with nice greenish hints, brilliant. Fine and persistent perlage.

#### BOUQUET

Fresh and aromatic notes typical for the grape variety, rich in fruity perfumes, with hints of green-apple, Williams-pear and citrus, blending into floral notes.

#### TASTE

In the mouth the wine is pleasantly soft, with a velvety sensation that caresses the palate. The typical aromatic and fruity notes are good balanced with the nice acidity. Typical long lasting after taste of green-apple.
